Comments:

This case is a site designation VAP. It formerly consisted of residences, commercial outlets, and a bowling alley. Per the Phase I, there was also a gas station and cleaners prior to 1960. This area will become a mixed residential / commercial use. Soil gas samples from the first consultant (SCST) over the entire area revealed ND results except for trace toluene and xylenes in a few samples. These samples were collected on March 20, 2003.

During June 2004, the northern portion was excavated without consulting DEH, and without a consultant to oversee the work. Per the new consultant, Ninyo & Moore, this was done prior to them being contracted for this project. This material had been transported to an industrial site in San Ysidro. No profiling had been done. Based on the low levels from the soil gas and lead samples taken from that area Ninyo & Moore claimed that this should provide some level of comfort that the excavated soil was probably suitable for export and off-site reuse. Since DEH was not consulted or notified of the soil reuse it did not provide oversight of this activity.

Soil excavation of 4 to 5 feet on the southern portion of the property commenced around September 2004. Within this area, 38 randomly selected soil samples were taken. None of these samples contained Volatile Organic Compounds (VOC's); they also did not contain heavy metals over 50 times the STLC with the exception of lead. Excavation and confirmation sampling was performed on eight sample areas that were either over the STLC of lead (50 mg / kg), or had any reportable TPH. Confirmation samples of these areas indicated adequate removal of impacted soil.

Two Underground Storage Tanks (UST's) were discovered during the excavation. Both were approximately 500 gallons. The first one, on the eastern portion of the property, did not contain levels of contaminants to warrant opening a LOP case; however, the second UST, located on the western of the property, was opened as LOP case H39622-2. Adequate removal of contaminated soil occurred so that the UST case could be recommended for closure.

One burn pit was also discovered during this excavation. The San Diego LEA was given an approval to take the lead in overseeing the workplan for the removal of the burn pit. Based on this approved workplan, excavation of the burn pit soils was performed with confirmation sampling that indicated adequate removal.

The consultant claims that there are no health risks to the site due to the excavation of all lead in excess of 50 mg/kg including the former burn pit. In relation to the former tank case, most of the diesel impacted soil was removed except for a small quantity that poses no health risks. DEH concurs with the consultant's conclusions.

JACK MILLER ASSISTANT DIRECTOR

January 24, 2008

Mr. Resse Jarrett Carter, Reese #18 LLP 2250 4th Ave., Ste. 300 San Diego, CA 92104

Dear Mr. Jarrett:

UNAUTHORIZED RELEASE FROM UNDERGROUND STORAGE TANK AT 4356 30th STREET, SAN DIEGO, CA 92104 CASE H39622-002

This letter confirms the completion of a site investigation and corrective action for the underground storage tank currently located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the current underground storage tanks is greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tank site is in compliance with the requirements of subdivisions (a) and (b) of Section 25296.10 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.3 of the Health and Safety Code and that no further action related to the petroleum release at the site is required.

This notice is issued pursuant to subdivision (g) of Section 25296.10 of the Health and Safety Code. Please contact Ewan Moffat at (619) 338-2212 if you have questions regarding this matter.

Sincerely,

GARY W. ERBECK, Director
